Introduction

Requirements Analysis

Requirements

functional and non-function ..

Design

Our design is very simple, which makes it super easy to learn for children.

use cases (he said screenshots of each state of the program and I think it should be here under use cases)

sequence diagrams

components of the system

compare to other similar products (like for ex we can say our product is better for kids cuz ...)

Technical part or implementation

document the tools and talk about them

clarify the limitations

detailed breakdown of the models specification of the system.

prototype

Evaluation

based on requirements, tools used, etc .
